Forecast for Saturday 05 Jun 2021

Weather: Some isolated mist and fog patches forming in the early hours, but soon lifting and clearing in the early morning. A dry and sunny morning with scattered cloud from noon onwards. Cloud increasing further throughout the afternoon, perhaps with outbreaks of rain reaching western areas of Snowdonia from early evening. The rain is likely to be largely light with heavier bursts possible.

Chance of cloud free mountain/hill tops above 800m: 90%, falling to 40% from mid-afternoon.

Visibility: Early mist and fog patches reducing visibility to 800-4000m, but these soon clearing. General very good visibility throughout the day with cloud bases above summits. However cloud bases will reduce from mid-afternoon towards 1000m, with outbreaks of rain reducing visibilities to moderate late in the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are likely to be high during sunny spells, so sun protection is recommended if you plan to spend much of the day in the mountains. However the weather is likely to deteriorate during the afternoon with outbreaks of rain possible later, so some provision for wet weather clothing it recommended.

Forecast for Sunday 06 Jun 2021

Weather: Generally overcast during the morning with outbreaks of light rain and drizzle. The rain and drizzle should ease during the afternoon, becoming showery before clearing. Cloud lifting and breaking up during the afternoon.

Maximum wind: Southwesterly 15-20 mph, with gusts of 25 mph

Chance of cloud free mountain/hill tops above 800m: 40% increasing to 70% during the afternoon

Visibility: Generally moderate to good, however with cloud bases from 800m and occasionally dropping to 500-600m, visibilities on some summits may be limited at times during the morning, cloud bases lifting more generally from mid-afternoon with visibility improving to good.

Temperature: **Valleys:** Plus 11 Celsius, becoming Plus 15 Celsius
At 800m: Plus 6 Celsius, becoming Plus 12 Celsius
Freezing level: Above summits throughout.

Wednesday	Cloud increasing from the west during the day, perhaps with some light rain into western areas later.
